Professional Summary : Versatile Computer Science graduate currently working as a Junior System Analyst, with diverse experience spanning full-stack development, data analysis, and AI engineering. Possessing a strong analytical mindset and a passion for problem-solving, I am eager to apply technical skills and a continuous improvement approach to drive impactful results.

Experience:

Junior System Analyst- Developer

October 2024 – Present

GSL-AI Shirawi Group of Companies - Dubai

- Developed full-stack Django Python web application with form validations and MSSQL integration to digitize warehouse quality analysis processes **Skills:** Django, Python, MSSQL, Form Validation, Database Integration
- Built .NET backend web application functionality enabling operations team to update database fields through web forms with real-time MSSQL synchronization **Skills:** C#, .NET, MSSQL
- Managed MSSQL database operations for 3PL warehouse system and created SSRS and IBM Cognos reports with advanced SQL views to deliver business intelligence insights while ensuring data integrity across all processes **Skills:** MSSQL, SSRS, Cognos, SQL Views
- Provided enterprise software technical support for Manhattan SCALE warehouse software, integrating with MSSQL databases to resolve helpdesk tickets **Skills:** Manhattan SCALE, System Configuration, Technical Support, MSSQL Integration
- Developed a full-stack application to track and visualize c-suite employee leave schedules with an intuitive calendar interface. The system pulls real-time data from an MSSQL database and displays it in a responsive, user-friendly format **Skills:** React, TypeScript, Vite, Tailwind-CSS, FastAPI, Python, MSSQL

Data Analyst Intern

January 2024 – July 2024

Barakat Group of Companies - Dubai

- Web Scraping & Automation: Saved the company 50,000 AED by automating scraping competitor data using Python web scraping packages **Skills:** BeautifulSoup, Selenium, Python, Insomnia API REST platform
- Web Application for Data Intake (Django Framework): Enhanced data entry accuracy and reduced manual effort by building a user-friendly Django web application for the QA team that stores data in MSSQL database and generates PowerBI reports. **Skills:** Django, MSSQL, PowerBI, Excel, Python, Ubuntu, HTML, CSS, Jinja
- Gained exposure to Power Automate workflows and SharePoint CMS during cross-functional collaboration with IT and operations teams **Skills:** Power Automate, Content Management System, Sharepoint, Javascript
- Creating dashboard: Created Passport control dashboard for passport tracking and expiry of the daily workers using PowerBI **Skills:** PowerBI, Business Intelligence, Report Development

AI Engineer Intern

September 2023 – January 2024

Upskillr.ai

- Created a PDF Chatbot which inputs PDF file upto 200mb and can answer questions about the PDF Using Langchain, OpenAI API **Skills:** Langchain, Hugging Face, Python, Large Language Models

Data Analyst Intern

June 2022 to August 2022

Lupin Limited - Mumbai

- Exploratory data analysis :Became proficient in pandas.Deep dived into various machine learning and data science conceptsData modeling on given dataset **Skills:** ML Algorithms, Data Modelling, Exploratory Data Analysis, Pandas, Python

Technical Skills:

- Languages: Python, TypeScript, JavaScript, C, C#, HTML/CSS, SQL, Bash, Excel Functions
- Frameworks and Libraries: Django, Flask, .NET, Pandas, Selenium, BeautifulSoup

Projects:

Asphalt Pavement Design Optimization using ML & ANN (Semester Project- Feb 2023 to June 2023)

- **Objective:** Develop innovative asphalt pavement design using artificial neural networks and machine learning to minimize life-cycle costs
- **Problem Focus:** Predict critical metrics including rut depth and International Roughness Index (IRI) for cost-effective pavement design
- **Machine Learning Implementation:** Built accurate prediction models using ANNs and ML techniques to forecast IRI and rutting behavior
- **Advanced Modeling:** Integrated probabilistic modeling to enhance decision-making and account for performance uncertainties

Customer Credit Card Churning in Machine Learning

- **Objective:** Predict credit card customer churn using XGBoost machine learning model
- **Front End Development:** Built user interface using Streamlit framework focused on customer churn prediction
- **Data Processing:** Performed comprehensive data preprocessing and dataset transformation for effective analysis
- **Visualization & Modeling:** Applied data visualization techniques and implemented XGBoost for predictive modeling
- **User Experience:** Enhanced user interaction through Streamlit interface for exploring and interpreting churn prediction results

Education

B.E : Computer Science BITS Pilani Dubai Campus-Dubai GPA: 7.9

SS Jr College - Navi Mumbai-Grade: 83%

Fr Agnells Multipurpose School - Navi Mumbai-Grade: 94%

Certifications:

Python Masterclass 21' (Udemy)

Data Analysis with Python and Pandas 22' (Udemy)

Data Analytics with Wharton University 23' (Coursera)

Microsoft PoweBI 24'(Udemy)

Microsoft Azure Fundamentals AZ-900 25'

Anthropic AI Fluency: Framework & Foundations 25'

Anthropic Building with the Claude API 25'

Hobbies:

Sports Statistics

College Tennis Team Captain
