Experience:

Junior System Analyst- Developer(October 2024 – Present)

GSL-AI Shirawi Group of Companies - Dubai

- Developed full-stack Django Python web application with form validations and MSSQL integration to digitize warehouse tally sheets. (*Django, Python, MSSQL*)
- Created Boomi automation workflows that process user-submitted Excel files from a designated path and automatically sync records to the database, eliminating manual ad-hoc SQL update requests (*Boomi Atom, SQL*)
- Managed MSSQL database operations for 3PL warehouse system, optimized query using CTEs and advanced SQL views, and created SSRS and IBM Cognos reports. (*MSSQL, SSRS, Cognos, SQL*)
- Assisted in the migration of on-prem application and database to Azure Cloud, including path reconfiguration and post-migration functional and data validation testing (*Azure, MSSQL, testing*)
- Built a full-stack leave schedule tracking application for c-suite employees featuring a real-time calendar interface powered by a FastAPI backend and MSSQL database (*React, TypeScript, Vite, Tailwind-CSS, FastAPI, Python, MSSQL*)

Data Analyst Intern (January 2024 – July 2024)

Barakat Group of Companies - Dubai

- Delivered the company 50,000 AED per week in cost savings by automating competitor data scraping using Python web scraping packages to compare and adjust prices. (*Beautiful Soup, Selenium, Python, Insomnia API REST platform*)
- Developed User-friendly Django web application for the QA team that stores data in MSSQL database and generates Power BI reports. (*Django, MSSQL, Power BI, Excel, Python, Ubuntu, HTML, CSS, Jinja*)
- Built a Power BI passport tracking dashboard for HR monitoring blue-collar worker passport expiries, with automated Power Automate alerts triggered 30 days before expiry. (*Power BI, Power Automate*)

AI Engineer Intern (September 2023 – December 2023)

Upskillr.ai

- Built a PDF chatbot using LangChain and OpenAI API with a vector-based document retrieval layer, enabling users to semantically query PDF documents up to 200MB. (*Langchain, Hugging Face, Python, LLMs*)

Data Analyst Intern(June 2022 - August 2022)

Lupin Limited – Mumbai

- Performed exploratory data analysis and built machine learning models on pharmaceutical datasets using Python and Pandas. (*ML Algorithms, Data Modelling, EDA, Pandas, Python*)

Technical Skills:

- **Languages:** Python, TypeScript, JavaScript, C, C#, SQL, HTML, CSS, PowerShell, Bash
- **Frameworks & Libraries:** Django, Flask, .NET, React, Pandas, Selenium, Beautiful Soup
- **Tools & Platforms:** Azure, MSSQL, n8n, PostgreSQL, Git, VS Code, Postman, Insomnia, Jupyter, Boomi, Power Automate

Projects:

Asphalt Pavement Design Optimization using ML & ANN

- Built ML and ANN models on structured engineering datasets to predict pavement performance metrics, applying feature engineering and model evaluation techniques for optimization. (*Python, Pandas, Jupyter, Semester Project*)

Natural Language to SQL Analytics Agent

- Build a system where users type plain English question, an AI agent converts it to SQL, runs it against a database, and returns both the answer and a visualization. (*Python, FastAPI, LangChain, RAG, ChromaDB, Claude API, PostgreSQL, Pandas, Plotly, n8n, Docker, Railway*)

Education:

B.E: Computer Science BITS Pilani Dubai Campus-Dubai GPA: 7.9

Certifications:

Microsoft: Azure Fundamentals AZ-900 25'

Anthropic: Building with the Claude API 25'

Coursera: Data Analytics with Wharton University 23'
