

Nikhil Singh Boura

Address: Dubai

Phone: +971 54 383 1669 - **Email:** nikhilboura1@gmail.com

LinkedIn: <https://www.linkedin.com/in/nikhil-boura-b9183521a/> **GitHub:** <https://github.com/Boura77>

Experience:

Junior System Analyst- Developer

October 2024 – Present

GSL-AI Shirawi Group of Companies - Dubai

- Developed full-stack Django Python web application with form validations and MSSQL integration to digitize warehouse tally sheets. **Skills:** Django, Python, MSSQL, Form Validation, Database Integration
- Built .NET backend web application functionality enabling operations team to update database fields through web forms **Skills:** C#, .NET, MSSQL
- Managed MSSQL database operations for 3PL warehouse system and created SSRS and IBM Cognos reports with advanced SQL views. **Skills:** MSSQL, SSRS, Cognos, SQL Views
- Provided enterprise software technical support for Manhattan SCALE warehouse software, integrating with MSSQL databases to resolve helpdesk tickets **Skills:** Manhattan SCALE, System Configuration, Technical Support, MSSQL Integration
- Developed a full-stack application to track and visualize c-suite employee leave schedules with an intuitive calendar interface. The system pulls real-time data from an MSSQL database and displays it in a responsive, user-friendly format **Skills:** React, TypeScript, Vite, Tailwind-CSS, FastAPI, Python, MSSQL

Data Analyst Intern

January 2024 – July 2024

Barakat Group of Companies - Dubai

- Saved the company 50,000 AED per week by automating scraping competitor data using Python web scraping packages to compare and adjust prices. **Skills:** BeautifulSoup, Selenium, Python, Insomnia API REST platform
- Developed User-friendly Django web application for the QA team that stores data in MSSQL database and generates Power BI reports. **Skills:** Django, MSSQL, Power BI, Excel, Python, Ubuntu, HTML, CSS, Jinja
- Created fundamental in Power Automate workflows **Skills:** Power Automate
- Created Passport control dashboard for passport tracking and expiry of the blue-collar daily workers using Power BI for HR. **Skills:** Power BI, Business Intelligence, Report Development

AI Engineer Intern

September 2023 – December 2023

Upskillr.ai

- Created a PDF Chatbot which inputs PDF files up to 200mb and can answer questions about the PDF Using Langchain, OpenAI API **Skills:** Langchain, Hugging Face, Python, Large Language Models

Data Analyst Intern

June 2022 to August 2022

Lupin Limited - Mumbai

Became proficient in pandas. Deep dived into machine learning and data science concepts by Data modeling on given dataset **Skills:** ML Algorithms, Data Modelling, Exploratory Data Analysis, Pandas, Python

Technical Skills:

- Languages: Python, TypeScript, JavaScript, C, C#, HTML/CSS, SQL, Bash, Excel Functions
- Frameworks and Libraries: Django, Flask, .NET, Pandas, Selenium, BeautifulSoup

Projects:

Asphalt Pavement Design Optimization using ML & ANN (Semester Project- Feb 2023 to June 2023)

- **Objective:** Develop innovative asphalt pavement design using artificial neural networks and machine learning to minimize life-cycle costs
- **Problem Focus:** Predict critical metrics including rut depth and International Roughness Index (IRI) for cost-effective pavement design
- **Machine Learning Implementation:** Built accurate prediction models using ANNs and ML techniques to forecast IRI and rutting behavior
- **Advanced Modeling:** Integrated probabilistic modeling to enhance decision-making and account for performance uncertainties

Customer Credit Card Churning in Machine Learning (December 2022)

- **Objective:** Predict credit card customer churn using XGBoost machine learning model
- **Front End Development:** Built user interface using Streamlit framework focused on customer churn prediction
- **Data Processing:** Performed comprehensive data preprocessing and dataset transformation for effective analysis
- **Visualization & Modeling:** Applied data visualization techniques and implemented XGBoost for predictive modeling
- **User Experience:** Enhanced user interaction through Streamlit interface for exploring and interpreting churn prediction results

Education:

B.E : Computer Science BITS Pilani Dubai Campus-Dubai GPA: 7.9

Certifications:

Python Masterclass 21' (Udemy)

Data Analysis with Python and Pandas 22' (Udemy)

Data Analytics with Wharton University 23' (Coursera)

Microsoft PoweBI 24'(Udemy)

Microsoft Azure Fundamentals AZ-900 25'

Anthropic AI Fluency: Framework & Foundations 25'

Anthropic Building with the Claude API 25'
